On December 16, 2018 I sent an email regarding a request for demolition on this very same property. It is very disheartening to all of us in this small designated historic district to repeatedly have to deal with the same address and individual. As far as I can see this request does not differ much from her pervious requests. How long are we going to have to keep defending and protecting this very special street in what used to be a very special neighborhood?

I certainly ask that this request be denied once again and sincerely hope that we can have an end to dealing with this address.

Thanking you for your no vote!
